

RANGE OF VIEW STUDIOS · ATLANTA

The Beltline Visibility Report

for ElectroBike Georgia

Eastside Trail · Old Fourth Ward

How customers actually find Beltline businesses in 2026, and where
ElectroBike Georgia is visible, invisible, and *leaving money on the path*.

July 2026

Prepared by Range of View Studios

ElectroBike Georgia, Atlanta's first full-service e-bike shop. The storefront works. This report is about the second storefront, the one on the phone.

Where ElectroBike Georgia is losing the search.

2.5M

visitors a year move along the Beltline you sit on. The ones who search or ask AI for an e-bike get handed to other shops.

Beltline: 2.5M annual visits (Econsult / ABI, 2026). You are on the Eastside Trail; your search presence is not.

SEO · FOUND ON GOOGLE

5_{/10}

You show up for "e-bike Atlanta," but not the Beltline you are on.

GEO · RECOMMENDED BY AI

3_{/10}

Ask AI for an e-bike near the Beltline and it names other shops.

AEO · BEING THE ANSWER

5_{/10}

Strong FAQ, but nothing you publish claims the trail.

3

e-bike shops rank above you for "near the Beltline"

0

AI picks for "near the Beltline" that include you

0

2026 "best Atlanta e-bike" lists you appear on

Bottom line: You are physically on the Eastside Beltline, and you press-released exactly that, yet every "Beltline" search hands the customer to shops named after the trail. The fastest fix: claim the Beltline in your homepage title, your schema, and the 2026 Atlanta e-bike lists, and you win the ground you already stand on.

WHY THIS REPORT EXISTS

The foot traffic is already yours. The searches are not.

The Beltline now carries **2.5 million visits a year**, and those visitors spend **more than \$52 million** at the restaurants, shops, and studios along the corridor.¹ In June 2026 the Southside segments connected into **16.7 continuous miles** linking 36 neighborhoods, so quiet corridors are about to see Eastside-level traffic.²

But a walk-by is only half of how a Beltline customer happens. The other half happens on a phone: before they visit, after they pass you, or instead of ever noticing your frontage. This report checks whether that second half finds you, across three layers.

The ride people are already searching for. The only question is whether the search points them to you, or to the shop that claimed the trail first.

SEO

Found on Google: search, Maps, and the local pack.

GEO

Recommended by AI: ChatGPT, Perplexity, Gemini, AI Overviews.

AEO

Being the answer: snippets, Q&A, and question-shaped search.

THE MOMENT OF DECISION

This is the screen your next customer actually sees.

Someone on the trail pulls out their phone. They search, or they ask AI. Three names come up. Watch for yours.

● ● ● *e-bikes near the Beltline*

GOOGLE · THE LOCAL PACK

1 **The Belt Hub**
Old Fourth Ward · rides on the trail

2 **Beltline Biking**
"Beltline" right in the name

3 **Atlanta Bicycle Barn**
Steps from the Eastside Trail

× **ElectroBike Georgia**
Not on this screen

● ● ● *ChatGPT · Perplexity · Gemini*

AI · THE RECOMMENDATION

"Where should I get e-bikes near the Atlanta Beltline?"

"A few local favorites right off the trail: **The Belt Hub**, **Beltline Biking**, and **Atlanta Bicycle Barn**. All well reviewed and walkable from the corridor."

ElectroBike Georgia · not named for "near the Beltline." The trail-named shops are.

Recreated from your live Google and AI results, captured during the audit.

2.5M

visits a year walk the corridor¹

~46%

of searches carry local intent, most on a phone⁷

45%

now ask AI to pick the place³

and the pick goes to whoever search and AI can read. Today, rarely you.

THE SHIFT

Search moved. Most Beltline businesses did not move with it.

CONSUMERS USING AI TO FIND LOCAL BUSINESSES

CLICKS ON REGULAR GOOGLE RESULTS, WHEN AN AI ANSWER BOX APPEARS

And AI does not read your homepage first. Across 680 million citations, the engines lean on review sites and community content, not business websites:

YOUR SCORECARD

Where *ElectroBike Georgia* stands today

Scored from a live audit: your Google and Maps presence, an AI-answer test across three engines, and an on-page review. Fill the segments and finding for each layer.

SEO · found on Google

5 / 10

You rank for generic "e-bike Atlanta" (a 2026 top-8 list has you at #3), but your page titles say "Atlanta," not "Beltline," and Yelp sits at 3.1 stars. Prime location, generic signals.

GEO · recommended by AI

3 / 10

Ask for "e-bikes near the Beltline" and AI names The Belt Hub, Beltline Biking, and the Bike Barn. You are on the Eastside Trail, yet absent from the 2026 best-of lists AI quotes.

AEO · being the answer

5 / 10

You already run an 18-question FAQ, better than most shops. But none of it claims the Beltline or the Eastside Trail, so you do not own the "near the Beltline" answer.

LAYER 01 · SEO

Found on Google

Roughly 46% of searches carry local intent, and 76% of "near me" searchers visit within 24 hours.⁷ For a storefront on the trail, that search usually happens standing up, on a phone, within walking distance.

WHAT WE CHECKED	STATUS	WHAT WE FOUND
Google Business Profile: claimed, complete, current Complete profiles are 2.7x more likely to be considered reputable and get 50% more purchase consideration. ~1 in 9 is unclaimed.⁸	<i>Claimed</i>	<i>Listed in the Bicycle Barn building; category "Bikes." Add "Electric bike / e-bike" categories, trail-side photos, and "on the Beltline" to the description.</i>
Reviews: rating, volume, recency, owner responses 97% read reviews; 31% won't consider under 4.5 stars; stale reviews read as a closed sign.³	<i>Weak</i>	<i>Yelp 3.1 stars · 18 reviews; Facebook 13 (100% recommend). Recurring theme: repair turnaround and slow replies. Verify Google rating live.</i>
Local pack position for your money searches "e-bikes near the Beltline", "e-bikes Old Fourth Ward", "e-bikes near me" from the trail.	<i>Mixed</i>	<i>"e-bike shop Atlanta": present (a 2026 top-8 has you #3). "e-bike near the Beltline": not in the pack; trail-named shops win it.</i>
Website speed & mobile Only ~33% of sites pass Core Web Vitals; slow mobile loses most visitors.⁹	<i>Verify</i>	<i>WordPress / WooCommerce store with lazy-loaded imagery. Run PageSpeed on the final pass and log mobile LCP.</i>
Apple Maps & Bing Places Apple Maps is default on iPhone, 5B+ requests weekly; Bing feeds Copilot and ChatGPT search.¹⁰	<i>Verify</i>	<i>Confirm Apple Maps and Bing Places are claimed and match 151 Sampson St NE, Suite C.</i>

LAYER 02 · GEO

Recommended by AI

The layer almost nobody on the corridor has touched, which makes it the cheapest ground to take. AI recommends from what it can read and verify: your structured data,

your entity consistency, and the third-party corpus of reviews, guides, and lists it cites.⁶

WHAT WE CHECKED	STATUS	WHAT WE FOUND
The AI answer test: ChatGPT, Perplexity, Gemini asked for your category near the Beltline, 3 phrasings each The blunt measure: when a customer asks, do you exist?	<i>Absent</i>	<i>For "near the Beltline," AI summaries name The Belt Hub, Beltline Biking, and Atlanta Bicycle Barn. Run all 9 phrasings live and log each engine.</i>
Presence in the corpus AI reads: Yelp, TripAdvisor, Reddit, Foursquare, local press Review platforms and community content are AI's top local sources.⁶	<i>Thin</i>	<i>On Yelp (3.1 stars) and Facebook; light on Reddit, local press, and the Beltline guides AI cites.</i>
Beltline guide & listicle inclusion: beltline.org directory, Discover Atlanta, Atlanta Magazine, Eater Dense-metro "best of" queries lean on exactly this authority content.¹¹	<i>Missing</i>	<i>Absent from the 2026 "best Atlanta e-bike stores" list; in one "top 8" at #3, behind Edison and the Bicycle Barn. Not in Beltline.org or Discover Atlanta guides.</i>
Structured data & an AI-readable About page: LocalBusiness schema, geo, plain-language who/where/why The machine-readable you; absent on most small-business sites.	<i>Missing</i>	<i>No visible LocalBusiness schema; the address sits in footer text only. No geo or "on the Beltline" signal a machine can read.</i>

Being the answer

Across 43,000 profiles studied, **91% of customer questions on Google Business Profiles were never answered by the owner**, and most that were got answered by strangers.¹² On the Beltline that means passersby ask "is there parking," "do they take walk-ins," "dog friendly," and someone else speaks for you.

WHAT WE CHECKED	STATUS	WHAT WE FOUND
Google profile Q&A: owned and answered	<i>Verify</i>	<i>Check the Google profile for open, owner-unanswered questions, then seed your own (parking, test rides on the trail, rentals).</i>
Question-shaped content on your site: FAQ, pricing, parking, hours, booking Pages that win snippets answer in the first sentence.	<i>Strong</i>	<i>An 18-question FAQ is already live (products, maintenance, safety, buying). Add Beltline, parking, and "test ride on the Eastside Trail" questions.</i>
Answer presence for your question searches "is ElectroBike dog friendly", "e-bikes beltline parking".	<i>Gap</i>	<i>Nothing on the site owns "e-bike shop on the Atlanta Beltline" or "Eastside Trail e-bike rental." The trail-named shops answer it.</i>

NO STRINGS ATTACHED

Five fixes you can make this week, free

Whether or not we ever work together, do these. Each is backed by the data above and costs nothing but an hour.

01

Claim and complete your Google Business Profile, fully

Every field: categories, hours, trail-side photos, attributes, description. Complete profiles get 2.7x the credibility and 50% more purchase consideration.⁸

02 Answer every open question on your profile, then seed five of your own 91% of owners never do.¹² Parking, walk-ins, dogs, cards, reservations: ask and answer them yourself.

03 Restart review velocity, and reply to every one
A QR card at the register is enough. Recency now matters as much as rating, and AI reads the same reviews.³

04 Add LocalBusiness schema and a plain-language About page
State what you are, where you are (including "on the Beltline" and your segment), who you serve, in words a machine can quote.

05 Get onto the lists AI actually reads
Beltline.org's directory, Discover Atlanta, neighborhood guides, an active Yelp, plus Apple Maps and Bing. This footprint is what AI cites.⁶

METHODOLOGY & SOURCES

How this was put together

Findings for *ElectroBike Georgia* were gathered by hand in *July 2026* : live queries on Google, Maps, ChatGPT, Perplexity, and Gemini from Atlanta; profile and listing checks; and an on-page site review. Market statistics come from the published research below, with vintage noted where a stat predates the page it lives on. AI answers vary by phrasing and day; we record the queries so every check is reproducible.

1. Econsult Solutions economic impact analysis for Atlanta Beltline Inc., May 2026.
2. Atlanta Beltline Inc. / SaportaReport, June 2026: Southside segments open, 16.7 continuous miles.
3. BrightLocal Local Consumer Review Survey 2026: 45% AI usage (6% prior year), 64% ages 30-44, 97% read reviews, 31% require 4.5+ stars.
4. SOCi Local Visibility Index, March 2026: 1.2% of locations recommended by ChatGPT; 45% overlap traditional vs AI winners.
5. Pew Research Center, July 2025: click rate 15% to 8% when an AI Overview is present (68,879 queries).
6. Profound citation analysis, 2024-2025: 680M citations; Reddit, Yelp, TripAdvisor, YouTube, Wikipedia among top sources.
7. Google consumer research (2016-2019 vintage, still the benchmark): ~46% local intent; 76% of "near me" visit within 24 hours.
8. Google Business Profile documentation: complete profiles 2.7x reputable, 50% more purchase consideration. SearchLab: ~11% unclaimed.
9. HTTP Archive / CrUX, 2025: ~33% of sites pass Core Web Vitals. Google/SOASTA 2017: 53% mobile abandon at 3s (vintage noted).
10. Apple: 5B+ Maps requests weekly, default on iPhone. Microsoft: Bing Places feeds Copilot and AI search.
11. Local Falcon study, May 2025: 60,000 simulations; proximity and authority in AI Overviews.
12. ThriveHive study of 43,000+ profiles (2019, largest available): 91% of questions unanswered by owners.
